IP Address Cheat Sheet

Private IP Ranges

Range	CIDR	Use
10.0.0.0 — 10.255.255.255	10.0.0.0/8	Large private networks
172.16.0.0 — 172.31.255.255	172.16.0.0/12	Corporate networks
192.168.0.0 — 192.168.255.255	192.168.0.0/16	Home/office LANs

CIDR Prefix Guide

CIDR defines networks by prefix length (/) instead of fixed classes.

CIDR	Mask	Hosts	Use
/8	255.0.0.0	16M	Legacy / large internal nets
/16	255.255.0.0	65K	Large LAN
/24	255.255.255.0	254	Small subnet / home LAN
/30	255.255.255.252	2	Point-to-point link
/32	255.255.255.255	1	Single host

Special IPv4 Addresses

Type	Address	Description
Unspecified	0.0.0.0	Default or undefined address
Broadcast	255.255.255.255	Broadcast to all on local net
Loopback	127.0.0.0/8	Local host testing
APIPA	169.254.0.0/16	Auto IP when DHCP fails
CGNAT	100.64.0.0/10	ISP-shared NAT space
Multicast	224.0.0.0 — 239.255.255.255	IPv4 multicast
Docs/Test	192.0.2.0/24, 198.51.100.0/24, 203.0.113.0/24	Reserved examples

IPv6 Essentials

Type	Range	Description
Unspecified	::	Unspecified address
Loopback	::1	Local host testing
Link-local	fe80::/10	Per-interface local use only
ULA	fc00::/7 (fd00::/8)	Private IPv6 nets
Docs/Test	2001:db8::/32	Reserved examples
